

# MWUA DECEMBER 2022 BI-MONTHLY MEETING

## HYBRID EVENT

### THE NONANTUM RESORT

95 Ocean Ave.

Kennebunkport ME 040456

December 15, 2022

## TECHNICAL PROGRAM

### Sprinkler Systems

10:30AM – 11:30AM

**Sprinkler Systems in Commercial Buildings**, *Richard McCarthy, Assistant Fire Marshall, Maine Fire Marshall's Office*

Richard will go through the process required for commercial buildings to receive approval for their sprinkler system. He will answer the following questions and more...

What is the regulatory agency that oversees private fire service?

What installation and testing standards are used for private fire services and private hydrants?

Are AWWA standards applicable to private sprinklers and hydrants?

11:30AM – 12:30PM

**Contractor Licensed Responsibilities**, *Eastern Fire Sprinkler (EFP), Representative*

EFP will address their licensed responsibility for any system that they are contracted to installed or maintain. EFP will also explain:

Why the actual pressure tests are important to the design of the private fire system.

The code that governs code and the standards that govern the installation of private fire service.

The role of the excavation contractor during installation.

The role of the excavation company during the installation of the private fire system.

Review case studies of the private fire systems.
