Your Instructor:

Tom Bahun II – Tom's Water Solutions

Tom is a Certified Instructional Trainer (CIT), with over 30 years of experience and expertise in developing, designing, and delivering water and wastewater safety, emergency response and operator certification training. He is well known for his fun and energetic training classes drawing upon what his students already know. Tom's focus is to lead his students through socially supported interactions to enhance learning and construct new understandings.

In addition to Tom's vast training experience and abilities, he has a long history of helping water and wastewater systems with his technical and managerial knowledge and understanding. In addition to Tom's training and consulting services provided through Tom's Water Solutions LLC, he is a full-time Water Systems Operator overseeing drinking water treatment and distribution at Maine's largest water and wastewater utility. He holds a State of Maine Class IV Water Treatment and Distribution Operator license, and a Grade 5 Wastewater Treatment Operator license.

Class Description

Between planned projects and unplanned emergencies, work zones are continually being set up by Water and Wastewater Utilities to support completion of needed construction, excavation, trenching, and more. With the easing of Covid restrictions and increased funding opportunities, infrastructure projects have taken off ultimately leading to more work zones and people working around them.

Join MWUA and Tom's Water Solutions as we review the requirements of OSHA's Excavation and Trenching Standard. The basic and proper procedures and methods for excavation/trenching will be discussed. In addition, we will review the important ways to protect workers, pedestrians, and motorists in and around road construction zones.
