Training that Fits your Needs

This training series has been graciously sponsored by the Maine Drinking Water Program which has enabled us to provide it free of charge. If you have a chance, please give the Maine Drinking Water Program a big **"Thank You!"**

Class Description

All of us in water face the challenges of complying with regulations every day. The Lead Service Line Inventory Requirements of the Lead and Copper Rule Revisions come with their own set of challenges – *determining pipe materials, educating and working with customers, dealing with unknowns, integrating inventories with other systems, and more.*

Join MWUA and our panel of experts as we take a deep dive into the requirements of Lead Service Line Inventories and how to comply. The three sessions in the series will start at the basics and build off each other to ultimately provide Maine Water Utilities with the information they need to build and submit their inventories successfully.

Don't miss out on this great opportunity to learn and network!
